

**BS150 STAND
COLOR CODE OPTIONS**

*See RB Series color codes
for body colors*

The Triton® can be customized using a combination of Beaver's RB16, RB18 and RB23 series vending machines. This attractive display provides product variety and possesses the high quality standard found only in a Beaver product. The Triton is constructed using die cast powder coated parts and triple chrome plated accents including the stand base, machine bases, lids, hoppers, dispensing chute doors and coin mechanisms. The machine bodies are high impact ABS plastic and the globes are shatterproof polycarbonate. The sliding extended cash drawer option secures over 1100 quarters per unit and can lock using a different key than the one used to open the machines. This operator friendly feature allows access to the machine for refilling while not necessarily permitting access to the cash.

Standard Features and Benefits

Base: BS150 Stand

Machines: Includes a combination of three machines, choosing from the RB16, RB18 and RB23 complete with New Generation single coin mechanisms

Globe: Shatterproof polycarbonate

Coin Mechanism: New Generation triple chrome plated, all metal, 25 cent coin mechanism with penny hole back plate

Metal Parts: Triple chrome plated adaptor ring, base (without extended cash box option), hopper, lid, door and coin mechanism
